

TEST REPORT

On Behalf of

Nebra Ltd

Product Name:	mini usb wifi dongle
Brand Name:	N/A CET OF CET O
Model Number:	FX-8188EA
Prepared For:	Nebra Ltd
Address:	Unit 4 Bells Yew Green Business Court, Bells Yew Green, East Sussex, United Kingdom
Prepared By:	Shenzhen DL Testing Technology Co., Ltd.
Address:	101-201, Building C, Shuanghuan, No.8, Baoqing Road, Baolong Industrial Zone, Baolong Street, Longgang District, Shenzhen, Guangdong, China
Date of Receipt:	May. 22, 2021
Test Date	May. 22, 2021 - May. 28, 2021
Date of Report:	May. 28, 2021
Report No.:	DL-20210531028-4S

test Report Tel: 400-688-3552 Web: www.dl-cert.com Email: service@dl-cert.com Page 1 of 71

TEST REPORT IEC 62368-1

Audio/video, information and communication technology equipment

Part 1: Safety requirements

Report Number: DL-20210531028-4S

Tested by (name) Kelly Tang

Compiled by (name) Nico Zou

Approved by (name) Jade Yang

Date of issue May. 28, 2021

Total number of pages: 71 pages

Applicant's name Nebra Ltd

Address Unit 4 Bells Yew Green Business Court, Bells Yew Green, East Sussex,

United Kingdom

Testing Laboratory.....: Shenzhen DL Testing Technology Co., Ltd.

101-201, Building C, Shuanghuan, No.8, Baoqing Road, Baolong

Report No.: DL-20210531028-4S

Address Industrial Zone, Baolong Street, Longgang District, Shenzhen,

Guangdong, China

Test specification:

Standard.....: IEC 62368-1:2014 (Second Edition)

Test procedure: test Report

Non-standard test method: N/A

Test Report Form No. IEC62368_1B

Copyright © 2014 Worldwide System for Conformity Testing and Certification of Electrotechnical Equipment and Components (IECEE), Geneva, Switzerland. All rights reserved.

Test item description mini usb wifi dongle

Brand Name N/A

Shenzhen Eastech Company Limited.

Bao'an District, Shenzhen City, Guangdong Province, China.

Model/Type reference FX-8188EA

Ratings: 5V===

test Report Tel: 400-688-3552 Web: www.dl-cert.com Email: service@dl-cert.com Page 2 of 7

List of Attachments (including a total number of pages in each attachment):

Attachment No. 1: 11 pages of EUROPEAN GROUP DIFFERENCES AND NATIONAL DIFFERENCES for

EN 62368-1:2014+A11:2017.

Attachment No. 2: 4 pages of photos.

Summary of testing:

Tests performed (name of test and test clause):

The submitted samples were tested and found to comply with the requirements of:

IEC 62368-1:2014 (Second Edition)

EN 62368-1:2014+A11:2017

Testing location:

101-201, Building C, Shuanghuan, No.8, Baoqing Road, Baolong Industrial Zone, Baolong Street, Longgang District, Shenzhen, Guangdong, China

Report No.: DL-20210531028-4S

Summary of compliance with National Differences:

List of countries addressed: National Differences and Group Differences as per CB bulletin. See the attachment of National and Group Differences for details.

☐ The product fulfils the requirements of EN 62368-1:2014+A11:2017.

General disclaimer:

The test results presented in this report relate only to the object tested.

This report shall not be reproduced, except in full, without the written approval of the Issuing DL Testing Laboratory. The authenticity of this Test Report and its contents can be verified by contacting the DL, responsible for this Test Report.

Copy of marking plate:

mini usb wifi dongle

Model: FX-8188EA

Rating: 5V===

Shenzhen Eastech Company Limited.

Made in China

- The above markings are the minimum requirements required by the safety standard. For the final production samples, the additional markings which do not give rise to misunderstanding may be added.

test Report Tel: 400-688-3552 Web: www.dl-cert.com Email: service@dl-cert.com Page 5 of 71

ENERGY SOURCE IDENTIFICATION AND CLASSIFICATION TABLE:

(Note 1: Identify the following six (6) energy source forms based on the origin of the energy.)

(Note 2: The identified classification e.g., ES2, TS1, should be with respect to its ability to cause pain or injury on the body or its ability to ignite a combustible material. Any energy source can be declared Class 3 as a worse case classification e.g. PS3, ES3.

Report No.: DL-20210531028-4S

Electrically-caused injury (Clause 5):

(Note: Identify type of source, list sub-assembly or circuit designation and corresponding energy source

classification)

Example: +5 V dc input ES1

Source of electrical e	energy	O, Ce,	Correspond	ling classification (ES)	,,00,
DC input	OV, sex	O ^V	ES1	OV. cer	O, Co,

Electrically-caused fire (Clause 6):

(Note: List sub-assembly or circuit designation and corresponding energy source classification)

Example: Battery pack (maximum 85 watts): PS2

Source of power or PIS	Corresponding classification (PS)
DC input	PS1

Injury caused by hazardous substances (Clause 7)

(Note: Specify hazardous chemicals, whether produces ozone or other chemical construction not addressed as part of the component evaluation.)

Example: Liquid in filled component Glycol

Sour	ce of haza	rdous sı	ubstances			Correspond	ling chemical		
N/A	Co	Χ.	O ^L	cert	O,	N/A	O ^V	Z ^X	Q. Ce

Mechanically-caused injury (Clause 8)

(Note: List moving part(s), fan, special installations, etc. & corresponding MS classification based on Table 35.)

Example: Wall mount unit MS2

Source of kinetic/mechanical energy	Corresponding classification (MS)
Equipment mass	MS1
Sharp edges and corners	MS1

Thermal burn injury (Clause 9)

(Note: Identify the surface or support, and corresponding energy source classification based on type of part, location, operating temperature and contact time in Table 38.)

Example: Hand-held scanner – thermoplastic enclosure TS1

() (0)	. / ×		~ O X.	
Source of thermal energy		· ·	Corresponding classification (TS)	
	()			

test Report Tel: 400-688-3552 Web: www.dl-cert.com Email: service@dl-cert.com Page 6 of 7

ENERGY SOURCE IDENTIFICATION AND CLASSIFICAT	ION TABLE:
External surface	TS1
Radiation (Clause 10)	
(Note: List the types of radiation present in the product and t Example: DVD – Class 1 Laser Product	he corresponding energy source classification.) RS1
Type of radiation	Corresponding classification (RS)
N/A	N/A O
ENERGY SOURC	E DIAGRAM
Indicate which energy sources are included in the energy so	urce diagram. Insert diagram below

6.2.3.1	Table: Determination	on of Potential Ignition Sources (Arcing PIS)							
		Open circuit voltage	Measured r.m.s						
		After 3 s	current	Calculated value	Arcing PIS?				
Š	Location	(Vp)	(Irms)	(V _p x I _{rms})	Yes / No				
cet	<u> </u>	o ce		5° 🔗	Cott.				

Supplementary information:

All primary circuit/components were considered as arcing PIS, the open circuit of all secondary components/circuit were not exceeded 50V.

An Arcing PIS requires a minimum of 50 V (peak) a.c. or d.c. An Arcing PIS is established when the product of the open circuit voltage (V_p) and normal operating condition rms current (I_{rms}) is greater than 15.

6.2.3.2	Table: Dete	ermination of Potentia	al Ignition Sour	ces (Resistive F	PIS)	N/A
Circuit Lo	ocation (x-y)	Operating Condition (Normal / Describe Single Fault)	Measured wattage or VA During first 30 s (W / VA)	Measured wattage or VA After 30 s (W / VA)	Protective Circuit, Regulator, or PTC Operated? Yes / No (Comment)	Resistive PIS? Yes/No
,0	× <) <u>~</u>	,00	O ^V	- Cer	

Supplementary Information:

All primary/secondary components were considered as resistive PIS.

A combination of voltmeter, VA and ammeter IA may be used instead of a wattmeter.

If a separate voltmeter and ammeter are used, the product of (VA x IA) is used to determine Resistive PIS classification.

A Resistive PIS: (a) dissipates more than 15 W, measured after 30 s of normal operation, <u>or</u> (b) under single fault conditions has either a power exceeding 100 W measured immediately after the introduction of the fault if electronic circuits, regulators or PTC devices are used, or has an available power exceeding 15 W measured 30 s after introduction of the fault.
