# TEST REPORT IEC/EN 62368-1

# Audio/video, information and communication technology equipment Part 1: Safety requirements

Report Number....:

Date of issue .....: Jan. 27, 2022

Total number of pages....::

Applicant's name .....: Nebra Ltd

Unit 4 Bells Yew Green Business Court, Bells Yew Green, Tunbridge Address....::

Wells, East Sussex, TN3 9BJ

**Test specification:** 

Standard .....: IEC 62368-1:2014 (Second Edition)

AS NZS 62368-1:2018

Test procedure.....: Test Report

Non-standard test method .....: N/A

Test Report Form No...... : IEC62368 1B

Test Report Form(s) Originator .....: UL(US) Master TRF....: 2014-03

#### General disclaimer:

The test results presented in this report relate only to the object tested.

This report shall not be reproduced, except in full, without the written approval by Jianyan Testing Group Shenzhen Co., Ltd.

The authenticity of this Test Report and its contents can be verified by Jianyan Testing Group Shenzhen Co., Ltd., responsible for this Test Report.

Test item description..... Nebra Indoor LoRa Gateway ROCK Pi 4 Version / Nebra Indoor

Helium Hotspot ROCK Pi 4 Version

Trade Mark ..... None

Manufacturer....: Same as Applicant Address....: Same as Applicant

Model/Type reference....: NEBHNT-HHRK4-433, NEBHNT-HHRK4-470, NEBHNT-HHRK4-

> 868, NEBHNT-HHRK4-915, NEBHNT-HHRK4-433-2, NEBHNT-HHRK4-470-2, NEBHNT-HHRK4-868-2, NEBHNT-HHRK4-915-2, NEBHNT-HHRK4-433-3, NEBHNT-HHRK4-470-3, NEBHNT-HHRK4-868-3, NEBHNT-HHRK4-915-3, NEBHNT-HHRK4-433-3, NEBHNT-HHRK4-470-3, NEBHNT-HHRK4-868-3, NEBHNT-

HHRK4-915-3

Ratings...... For adapter output: 12V=== 2.5A

#### Summary of testing:

#### Tests performed (name of test and test clause):

The submitted samples were tested and found to comply with the requirements of:

- IEC 62368-1:2014 (Second Edition)

- AS NZS 62368-1:2018

#### **Testing location:**

Jianyan Testing Group Shenzhen Co., Ltd.

No. 101, Building 8, Innovation Wisdom Port, No. 155 Hongtian Road, Huangpu Community, Xinqiao Street, Bao'an District, Shenzhen, Guangdong, People's Republic of China.

### Summary of compliance with National Differences:

List of countries addressed: National Differences and Group Differences as per CB bulletin.

The product fulfils the requirements of AS NZS 62368-1:2018

#### Copy of marking plate:

The artwork below may be only a draft. Until approval by National Certification Bodies and they shall not be affixed to products.

NEBRA FREQ: 915
Helium Hotspot
Model: NEBHNT-HHRK4-915
ETH: 2E:6D:50:00:FF:EE

NSER: aabbccddeeff0011 SER: 34996b0ff093000d FCC: 2AZDM-HHRK4 IC: 27187-HHRK4

Contains FCC IDs: 2ARPP-GL5712UX 2A3PA-ROCKPI4

Nebra LTD, UK Co No 06732600 Made in P.R.C

Representative marking for all models. Marking plates of other models are identical except model name.

#### **Energy Source Identification And Classification Table:**

(Note 1: Identify the following six (6) energy source forms based on the origin of the energy.)

(Note 2: The identified classification e.g., ES2, TS1, should be with respect to its ability to cause pain or injury on the body or its ability to ignite a combustible material. Any energy source can be declared Class 3 as a worse case classification e.g. PS3, ES3.

#### Electrically-caused injury (Clause 5):

(Note: Identify type of source, list sub-assembly or circuit designation and corresponding energy source classification)

Example: +5 V dc input ES1

| Source of electrical energy | Corresponding classification (ES) |  |
|-----------------------------|-----------------------------------|--|
| Internal circuit            | ES1                               |  |
|                             |                                   |  |

#### Electrically-caused fire (Clause 6):

(Note: List sub-assembly or circuit designation and corresponding energy source classification)

Example: Battery pack (maximum 85 watts): PS2

| Source of power or PIS                 | Corresponding classification (PS) |
|--|-----------------------------------|
| Charging circuit (not been classified) | PS2                               |

#### Injury caused by hazardous substances (Clause 7)

(Note: Specify hazardous chemicals, whether produces ozone or other chemical construction not

addressed as part of the component evaluation.)

Example: Liquid in filled component Glycol

| Source of hazardous substances Corresponding chemical |  | Corresponding chemical |
|---|--|------------------------|
| N/A   |  | N/A                    |
|   |  |                        |

#### Mechanically-caused injury (Clause 8)

(Note: List moving part(s), fan, special installations, etc. & corresponding MS classification based on Table

35.)

Example: Wall mount unit MS2

| Source of kinetic/mechani | cal energy | Corresponding classification (MS) |
|---------------------------|------------|-----------------------------------|
| Sharp edges and corners   |            | MS1                               |
| Equipment mass (<7kg)     |            | MS1                               |
|                           |            |                                   |

### Thermal burn injury (Clause 9)

(Note: Identify the surface or support, and corresponding energy source classification based on type of part, location, operating temperature and contact time in Table 38.)

Example: Hand-held scanner – thermoplastic enclosure TS

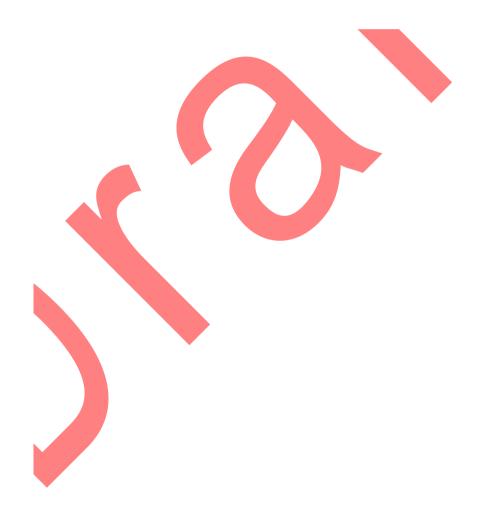

| Source of thermal energy | Corresponding classification (TS) |  |
|--------------------------|-----------------------------------|--|
| Accessible parts         | TS1                               |  |
|                          |                                   |  |

Page 6 of 67 Report No:

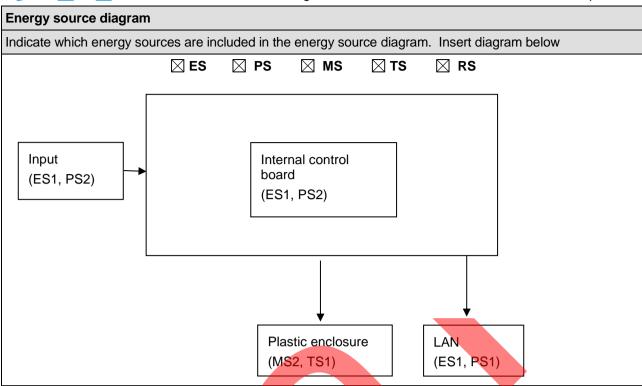

| 1 age of  | or or report ite:                                       |
|---|---|
| Radiation (Clause 10)   |   |
| (Note: List the types of radiation present in the product ar Example: DVD – Class 1 Laser Product | nd the corresponding energy source classification.) RS1 |
| Type of radiation   | Corresponding classification (RS)                       |
| LED indicator light   | RS1   |
|   |   |

#### Supplementary information:

Note 1: Tma should be considered as directed by appliable requirement

Note 2: Tma is not included in assessment of Touch Temperatures (Clause 9)

Note 3: The maximum ambient temperature specified by manufacturer is 40°C.

Condition a: Work runs.

#### Supplementary Information:

#### Notes

- [1] Supply voltage is the anticipated maximum Touch Voltage
- [2] Earthed neutral conductor [Voltage differences less than 1% or more]
- [3] Specify method used for measurement as described in IEC 60990 sub-clause 4.3
- [4] IEC60990, sub-clause 6.2.2.7, Fault 7 not applicable.
- [5] (\*) IEC60990, sub-clause 6.2.2.2 is not applicable if switch or disconnect device (e.g., appliance coupler) provided.

|         |   |                                 |        |                                    |   |                         |  |  |
|         |   |                                 |        |                                    |   |                         |  |  |

Supplementary information:

An Arcing PIS requires a minimum of 50 V (peak) a.c. or d.c. An Arcing PIS is established when the product of the open circuit voltage (V<sub>p</sub>) and normal operating condition rms current (I<sub>rms</sub>) is greater than 15.

| 6.2.3.2        | Table: Determination of Potential Ignition Sources (Resistive PIS) |  |   |   |   |  |                   |  |
|----------------|--|--|---|---|---|--|-------------------|--|
|                |  |  | Operating<br>Condition<br>(Normal<br>escribe Single | Measured<br>wattage or<br>VA<br>During first<br>30 s (W / | Measured<br>wattage or<br>VA<br>After 30 s (W | Protective Circuit, Regulator, or PTC Operated? Yes / No | Resistive<br>PIS? |  |
| Circuit Locati | ion (x-y)  |  | Fault)  | VA)   | / VA)   | (Comment)  | Yes/No            |  |
| LAN part te    | erminal  |  | Normal  |   | 0.00  |  | Yes               |  |

Supplementary Information:

A combination of voltmeter, VA and ammeter IA may be used instead of a wattmeter.

If a separate voltmeter and ammeter are used, the product of (VA x IA) is used to determine Resistive PIS classification.

A Resistive PIS: (a) dissipates more than 15 W, measured after 30 s of normal operation, or (b) under single fault conditions has either a power exceeding 100 W measured immediately after the introduction of the fault if electronic circuits, regulators or PTC devices are used, or has an available power exceeding 15 W measured 30 s after introduction of the fault.

|                      | the entry to the plug does not exceed 2 m (0.5 mm2 three-core supply flexible cords are not permitted; see AS/NZS 3191).  |                 |            |
|                      | 6 In Footnote c replace 'IEC 60320-1' with 'AS/NZS 60320.1'   |                 |            |
|                      | 7 In Footnote d replace 'IEC 60320-1' with 'AS/NZS 60320.1'   |                 |            |
| Annex M<br>Paragraph | Protection circuits for batteries provided within the equipment, Test method  |                 | Р          |
| M.3.2                | After the first dashed point add the following Note:  |                 |            |
|                      | NOTE 201: In cases where the voltage source is provided by power from an  |                 |            |
|                      | unassociated power source, consideration should be given to the effects of possible single fault conditions in the unassociated equipment. If the power source is unknown then it should be assumed that the maximum limit of SELV may be applied to the source input under assumed single fault conditions in the source when assessing the charging circuit in the equipment under test.  |                 |            |
|                      |   |                 | N/A        |
|                      | Special national conditions (if any)  |                 | N/A        |
| 6.201                | External power supplies, docking stations and other similar devices  For external power supplies, docking stations and other similar devices, during and after abnormal operating conditions and during single fault conditions the output voltage—  — at all ES1 outlets or connectors shall not increase by more than 10% of its rated output voltage under normal operating condition; and  — of a USB outlet or connector shall not increase by more than 3 V or 10%  of its rated output voltage under normal operating conditions, whichever is higher.  For equipment with multiple rated output voltages, the requirements apply with the equipment configured for each rated output voltage in turn.  NOTE: This is intended to reduce the possibility of battery fire or explosion in attached equipment or accessories when charging secondary lithium batteries.  Compliance shall be checked by measurement, taking into account the abnormal operating conditions of Annex B.3 and the simulated single-fault conditions of Annex B.4 |                 | N/A        |
| 6.202                | Resistance to fire—Alternative tests  |                 | N/A        |
| 6.202.1              | General Parts of non-metallic material shall be resistant to ignition and spread of fire.   |                 | N/A        |

Page 54 of 67

|         | EN 62368-1   |                 |         |
|---------|--|-----------------|---------|
| Clause  | Requirement + Test   | Result - Remark | Verdict |
|         | This requirement does not apply to decorative trims, knobs and other parts unlikely to be ignited or to propagate flames from inside the equipment, or the following:  |                 |         |
|         | a) Components that are contained in an enclosure having a flammability category of V-0 according to AS/NZS 60695.11.10 and having openings only for the connecting wires filling the openings completely, and for ventilation not exceeding 1 mm in width regardless of length.  |                 |         |
|         | b) The following parts which would contribute negligible fuel to a fire:   |                 |         |
|         | <ul> <li>small mechanical parts, the mass of which does<br/>not exceed 4 g, such as mounting parts, gears,<br/>cams, belts and bearings;</li> </ul>  |                 |         |
|         | <ul> <li>small electrical components, such as capacitors<br/>with a volume not exceeding 1 750 mm3,<br/>integrated circuits, transistors and optocoupler</li> </ul>  |                 |         |
|         | packages, if these components are mounted on material of flammability category V-1, or better, according to AS/NZS 60695.11.10.  |                 |         |
|         | NOTE: In considering how to minimize propagation of fire and what 'small parts' are,   |                 |         |
|         | account should be taken of the cumulative effect of small parts adjacent to each other   |                 |         |
|         | for the possible effect of propagating the fire from one part to another.  |                 |         |
|         | Compliance shall be checked by the tests of Clauses 6.202.2, 6.202.3 and 6.202.4.  |                 | N/A     |
|         | For the base material of printed boards, compliance shall be checked by the test of Clause 6.202.5.  |                 |         |
|         | The tests shall be carried out on parts of non-metallic material which have been removed from the equipment. When the glow-wire test is carried out, the parts shall be placed in the same orientation as they would be in normal use.   |                 |         |
|         | These tests are not carried out on internal wiring.  |                 |         |
| 6.202.2 | Testing of non-metallic materials  |                 | N/A     |
|         | Parts of non-metallic material shall be subject to the glow-wire test of AS/NZS 60695.2.11 which shall be carried out at 550°C.  |                 |         |
|         | Parts for which the glow-wire test cannot be carried out, such as those made of soft or foamy material, shall meet the requirements specified in ISO 9772 for category FH-3 material. The glow-wire test shall be not carried out on parts of material classified at least FH-3 according to ISO 9772 provided that the relevant part is not thinner than the sample tested. |                 |         |
| 6.202.3 | Testing of insulating materials  |                 | N/A     |
|         | Parts of insulating material supporting Potential Ignition Sources shall be subject  |                 |         |
|         | to the glow-wire test of AS/NZS 60695.2.11 which   |                 |         |
