#### TEST REPORT IEC 62368-1

# Audio/video, information and communication technology equipment

Part 1: Safety requirements

Report Number .....: DL-20210425003-4S

Tested by (name) ...... Kelly Tang

Compiled by (name) ...... Nico Zou

Approved by (name) ...... Jade Yang

Date of issue ...... Apr. 27, 2021

Total number of pages .....: 69 pages

Applicant's name ...... Nebra Ltd

Unit 4 Bells Yew Green Business Court, Bells Yew Green, East Sussex,

United Kingdom

Testing Laboratory.....: Shenzhen DL Testing Technology Co., Ltd.

101-201, Building C, Shuanghuan, No.8, Baoqing Road, Baolong

Report No.: DL-20210425003-4S

Address ....... Industrial Zone, Baolong Street, Longgang District, Shenzhen,

Guangdong, China

Test specification:

Standard.....: IEC 62368-1:2014 (Second Edition)

Test procedure .....: test Report

Non-standard test method .....: N/A

Test Report Form No. ..... IEC62368\_1B

Copyright © 2014 Worldwide System for Conformity Testing and Certification of Electrotechnical Equipment and Components (IECEE), Geneva, Switzerland. All rights reserved.

Brand Name .....: N/A

Shenzhen Eastech Company Limited.

Manufacturer...... 2nd floor, 3rd building, Baishixia Development Area, Fuyong Street,

Bao'an District, Shenzhen City, Guangdong Province, China.

Model/Type reference ...... FX-8510A

Ratings .....: 5V===

test Report Tel: 400-688-3552 Web: www.dl-cert.com Email: service@dl-cert.com Page 2 of 6

#### List of Attachments (including a total number of pages in each attachment):

Attachment No. 1: 11 pages of EUROPEAN GROUP DIFFERENCES AND NATIONAL DIFFERENCES for

EN 62368-1:2014+A11:2017.

Attachment No. 2: 2 pages of photos.

#### Summary of testing:

#### Tests performed (name of test and test clause):

The submitted samples were tested and found to comply with the requirements of:

Fits the British bias

IEC 62368-1:2014 (Second Edition)

BS EN 62368-1:2014+A11:2017

#### **Testing location:**

101-201, Building C, Shuanghuan, No.8, Baoqing Road, Baolong Industrial Zone, Baolong Street, Longgang District, Shenzhen, Guangdong, China

Report No.: DL-20210425003-4S

#### **Summary of compliance with National Differences:**

**List of countries addressed:** National Differences and Group Differences as per CB bulletin. See the attachment of National and Group Differences for details.

The product fulfils the requirements of BS EN 62368-1:2014+A11:2017.

#### General disclaimer:

The test results presented in this report relate only to the object tested.

This report shall not be reproduced, except in full, without the written approval of the Issuing DL Testing Laboratory. The authenticity of this Test Report and its contents can be verified by contacting the DL, responsible for this Test Report.

#### Copy of marking plate:

Bluetooth 4.0 usb dongle

Model: FX-8510A

Rating:5V===

Nebra Ltd

Made in China

- The above markings are the minimum requirements required by the safety standard. For the final production samples, the additional markings which do not give rise to misunderstanding may be added.

#### **ENERGY SOURCE IDENTIFICATION AND CLASSIFICATION TABLE:**

(Note 1: Identify the following six (6) energy source forms based on the origin of the energy.)

(Note 2: The identified classification e.g., ES2, TS1, should be with respect to its ability to cause pain or injury on the body or its ability to ignite a combustible material. Any energy source can be declared Class 3 as a worse case classification e.g. PS3, ES3.

Report No.: DL-20210425003-4S

#### Electrically-caused injury (Clause 5):

(Note: Identify type of source, list sub-assembly or circuit designation and corresponding energy source

classification)

Example: +5 V dc input ES1

| Source of electrical | energy | O, Ce, | Correspor | nding classification (ES) | CON    |
|----------------------|--------|--------|-----------|---------------------------|--------|
| DC input             | OF COR | 0      | ES1       |                           | O, Co, |

#### Electrically-caused fire (Clause 6):

(Note: List sub-assembly or circuit designation and corresponding energy source classification)

Example: Battery pack (maximum 85 watts): PS2

| Source of power or PIS | Corresponding classification (PS) |
|------------------------|-----------------------------------|
| DC input               | PS1                               |

#### Injury caused by hazardous substances (Clause 7)

(Note: Specify hazardous chemicals, whether produces ozone or other chemical construction not addressed as part of the component evaluation.)

Example: Liquid in filled component Glycol

| Sour | ce of hazaı | rdous su | bstances       | e de la companya de l |    | Correspond | ling chemical |     |        |
|------|-------------|----------|----------------|--|----|------------|---------------|-----|--------|
| N/A  | , Co,       | X        | O <sup>1</sup> | COX.   | O, | N/A        | OV. CS        | 31. | Q. Co. |

#### Mechanically-caused injury (Clause 8)

(Note: List moving part(s), fan, special installations, etc. & corresponding MS classification based on Table 35.)

Example: Wall mount unit MS2

| Source of kinetic/mechanical energy | Corresponding classification (MS) |  |  |  |
|-------------------------------------|-----------------------------------|--|--|--|
| Equipment mass                      | MS1                               |  |  |  |
| Sharp edges and corners             | MS1                               |  |  |  |

#### Thermal burn injury (Clause 9)

(Note: Identify the surface or support, and corresponding energy source classification based on type of part, location, operating temperature and contact time in Table 38.)

Example: Hand-held scanner – thermoplastic enclosure TS1

| (), (0)                  | . / × | ()  | ~ ( X.                            | 0 |
|--------------------------|-------|-----|-----------------------------------|---|
| Source of thermal energy |       | Y . | Corresponding classification (TS) |   |
|                          |       |     |                                   |   |

#### Supplementary information:

All primary circuit/components were considered as arcing PIS, the open circuit of all secondary components/circuit were not exceeded 50V.

An Arcing PIS requires a minimum of 50 V (peak) a.c. or d.c. An Arcing PIS is established when the product of the open circuit voltage ( $V_p$ ) and normal operating condition rms current ( $I_{rms}$ ) is greater than 15.

| 6.2.3.2     | Table: Determination of Potential Ignition Sources (Resistive PIS) |  |  |   |  |                             |  |  |  |

| ,C°         | . X  | <u>Y</u> cet   | ,00  | , O <sup>V</sup>                                    | - Cert   |                             |  |  |  |

#### Supplementary Information:

All primary/secondary components were considered as resistive PIS.

A combination of voltmeter, VA and ammeter IA may be used instead of a wattmeter.

If a separate voltmeter and ammeter are used, the product of (VA x IA) is used to determine Resistive PIS classification.

A Resistive PIS: (a) dissipates more than 15 W, measured after 30 s of normal operation, <u>or</u> (b) under single fault conditions has either a power exceeding 100 W measured immediately after the introduction of the fault if electronic circuits, regulators or PTC devices are used, or has an available power exceeding 15 W measured 30 s after introduction of the fault.

Report No.: DL-20210425003-4S

no damage, no hazard.

Supplementary information:

- 1) S-C: short circuit, O-L: overload, O-C: open circuit; CD: components damaged;
- 2) The Hi-pot test conducted successfully after the completion of fault condition test.
- 3) #: Alternative sources of fuse link have been considered.
